Segunda-feira

Fiquei com dúvida sobre a origem dos dados que foram coletados pelo *filebeat* e *heartbeat*.

O primeiro leu os dados do arquivo *paris920.log*?

E o terceiro baixou dados do site da Elastic?

[← Responder](#) (1 curtida)jordanamaralvicente@gmail.com (<https://academy.semantix.com.br/courses/120/users/5695>)

Terça-feira

Saulo, se entendi corretamente:

- O Filebeat vai enviar os arquivos da máquina em que ele está instalado, como é o caso do paris*, ou do serviço que ele foi configurado para pegar as informações. Vamos supor que você instala o módulo do Mysql, toda vez que o Mysql gerar um log o filebeat vai enviar pro elastic.

- No caso do heartbeat, ele não vai baixar os dados do site da Elastic, o que ele vai fazer será um "monitoramento" de um site que desejar. Supondo que você tenha um site seusite.com e queira analisar o downtime dele, você pode configurar o heartbeat para verificar o site e analisar as métricas pelo Kibana

palomaalves@hotmail.com (<https://academy.semantix.com.br/courses/120/users/4730>)

Terça-feira

Filebeat é responsável pelo envio dos dados de arquivos de uma determinada fonte (ex: logs) para um destino (ex: elasticsearch).

Heartbeat tem uma lista de serviços pré-configurados a serem monitorados, e a partir da sua inicialização, ele consegue monitorar a disponibilidade desse serviço e seu respectivo tempo de resposta.

Terça-feira

Boa tarde galera ,estou com um problema no final do exercício 1

Fiz todos os passos, rodei os comandos na ordem: `./filebeat test config` , `./filebeat test output` , e apareceu as mensagens de ok, depois `sudo chown...` informei a senha e rodei o ultimo comando: `sudo ./filebeat -e` , o terminal responde em loop infinito esta mensagem:

```
{"log.level":"info","@timestamp":"2022-03-29T16:51:34.103-0300","log.origin":  
{"file.name":"instance/beat.go","file.line":669},"message":"Home path:  
[/home/orenanvieira/treinamentos/elastic/filebeat-8.1.1-linux-x86_64] Config path:  
[/home/orenanvieira/treinamentos/elastic/filebeat-8.1.1-linux-x86_64] Data path:  
[/home/orenanvieira/treinamentos/elastic/filebeat-8.1.1-linux-x86_64/data] Logs path:  
[/home/orenanvieira/treinamentos/elastic/filebeat-8.1.1-linux-x86_64/logs]","service.name":"filebeat","ecs.version":"1.6.0"}  
  
{..}
```

Daí quando abro o Elastic e coloco GET filebeat... ele não reconhece o comando filebeat, fechei e abri o terminal e o navegador , tentei rodar novamente os comandos e fica da mesma forma.

Terça-feira

Renan,

Primeira coisa que notei é que seu filebeat está na versão 8.1.1. Porém a versão do cluster que estamos usando (caso esteja usando o do treinamento) é o 7.9.2. Aqui o link da versão correta (<https://www.elastic.co/pt/downloads/past-releases/filebeat-7-9-2>)

you can verify if the index was created in your cluster, test it with the following command:

```
GET /_cat/indices
```

It will show all indices that are there. If it doesn't appear, it may be that you forgot something.

It happened to me the same thing, when I went to see, I forgot to put enabled: true

renanfsvieira@gmail.com (<https://academy.semantix.com.br/courses/120/users/5866>)

Terça-feira

boa noite Jordan, rodei o comando que vc informou e não apareceu os índices, dai tentei editar os arquivos manualmente abrindo no vscode ou bloco de notas e está dando acesso negado, mesmo colocando sudo e confirmando a senha, nem pelo Windows consigo excluir a pasta do projeto, não sei o que fiz kkkkkkkkk

quando tento remover:

```
orenanvieira@LAPTOP-K9G31AS3:~/treinamentos/elastic$ sudo rmdir filebeat-8.1.1-linux-x86_64
```

[sudo] password for orenanvieira:

```
rmdir: failed to remove 'filebeat-8.1.1-linux-x86_64': Directory not empty
```

[orenanvieira@LAPTOP-K9G31AS3:~/treinamentos/elastic\\$](mailto:orenanvieira@LAPTOP-K9G31AS3:~/treinamentos/elastic$)
(mailto:orenanvieira@LAPTOP-K9G31AS3:~/treinamentos/elastic\$)

Como faço para remover essa pasta que está com acesso negado?

vou tentar fazer do zero nessa versão da aula, pelo "vi" acabo errando na digitação,

← [Responder](#) 👍 (1 curtida)

jordanamaralvicente@gmail.com (<https://academy.semantix.com.br/courses/120/users/5695>)

Terça-feira

Você pode digitar o comando

'rmdir /s filebeat-8.1.1-linux-x86_64' para excluir a pasta pelo windows

'rm -rf filebeat-8.1.1-linux-x86_64' pelo linux

← [Responder](#) 👍 (2 curtidas)

renanfsvieira@gmail.com (<https://academy.semantix.com.br/courses/120/users/5866>)

Terça-feira

Obrigado pela ajuda, conseguir configurar o filebeat refazendo do zero com a versão da videoaula, porém o metricbeat está dando erro ao rodar o ultimo comando e não criou o indice:

Terça-feira

É possível compartilhar o chat da aula ao vivo, para pegar os links compartilhados?

E o módulo Elastic 2 eu vou ter que trabalhar na Semantix pra conseguir fazer ou vocês também disponibilizam ele?

Quinta-feira

Professor, ao executar o **sudo find / -name docker.sock** na aula 6, me foi retornado 3 docker.sock em volumes diferentes.

O que pode ter ocasionado isso? E isso é impactante. O que devo fazer?

marco@DESKTOP-G2455QH:~/treinamentos/elastic/metricbeat-7.9.2-linux-x86_64/modules.d\$ **sudo find / -name docker.sock**

/mnt/wsl/docker-desktop/shared-sockets/guest-services/**docker.sock**

/mnt/wsl/docker-desktop-

Sexta-feira

Estou tendo um problema de permissão pra executar o filebeat que não consigo resolver ao rodar os comandos com `./filebeat`.

Se tento normalmente, recebo: **Exiting: error loading config file: config file ("filebeat.yml") can only be writable by the owner but the permissions are "-rw-rwxrwx" (to fix the permissions use: 'chmod go-w /mnt/c/Users/cterr/Documents/elastic/filebeat-7.9.2-linux-x86_64/filebeat.yml')**. Rodar o comando `chmod` com ou sem `sudo` da forma que o shell sugere, não funcionou. O erro persiste.

Usando `sudo` antes, recebo: **Exiting: error loading config file: config file ("filebeat.yml") must be owned by the user identifier (uid=0) or root.**

Alguém sabe o que fazer?

Ontem

bom dia,

no exercicio 1, meu count foi de 580 quando utilizo o comando `GET filebeat-7.9.2-2022.04.01-000001/_count` no elastic

nao entanto o do professor foi de 254052, acredito que como a data é diferente os documentos tambem, estou certa?

Ontem

talvez seja só que não deu tempo do beats carregar tudo para o Elastic.

Quando iniciei meu beats rodei o count 3 vezes seguidas e o número ainda estava crescendo.

Ontem

DICA windows:

Como estou usando windows, ao fazer o **pwd** para recolher o caminho completo na pasta onde se encontra o arquivo **paris-925.logs**, acabe pegando o **C** no início sendo que o próprio elastic adiciona ele, e por esse motivo, o meu arquivo não estava sendo carregado, pois ficava C:/c/home.....

Apenas peguem se atentem a esse ponto antes de copiar.

Ontem

Na aula 2 quando o professor usar o comando:

sudo find / -name docker.sock

Eu me quebro porque to usando windows com o wsl, e não tenho o sudo para alterar permissão, e quando tento usar no powershell como admin não tem a opção find.

Como posso achar esse caminho?
